

# HARIPRASANTH T

B.E Computer Science and Engineering Student (2024–2028)

[linkedin.com/in/ihariprasanth](https://www.linkedin.com/in/ihariprasanth) | [github.com/ihariprasanth](https://github.com/ihariprasanth) | [leetcode.com/ihariprasanth](https://leetcode.com/ihariprasanth)

Tiruppur, Tamil Nadu | 9962322926 | hariprasanth.user@gmail.com

## CAREER OBJECTIVE

Third-year Computer Science undergraduate with hands-on experience building and deploying full-stack web applications end-to-end — frontend interfaces, backend APIs, databases, and cloud deployment. Seeking an internship/entry-level opportunity to apply practical development skills to real-world engineering problems.

## EDUCATION

**VSB College of Engineering and Technical Campus, Coimbatore** 2024 – 2028

B.E. Computer Science and Engineering | CGPA: 8.52

**Kathiravan Matriculation Hr. Sec. School** 2023 – 2024

HSC (12th) | 87.16%

## TECHNICAL SKILLS

|                   |                                                                |
|-------------------|----------------------------------------------------------------|
| Languages         | JavaScript, TypeScript, Python, SQL, Java                      |
| Frontend          | React.js, HTML5, CSS3, Tailwind CSS                            |
| Backend           | Node.js, Express.js, Supabase                                  |
| Databases         | MySQL, PostgreSQL                                              |
| Tools & Platforms | Git, GitHub, Vercel, Hostinger, phpMyAdmin, VS Code            |
| Core              | Data Structures & Algorithms, REST APIs, Responsive Web Design |

## AREAS OF INTEREST

Web Development • Problem Solving • UI/UX Design • Cloud Computing

## PROJECTS

### APIForesight — Predictive API Reliability & Failure Intelligence Platform

Machine Learning, Microservices

- Designed an ML-driven platform that predicts downstream microservice and API failures ~10 minutes in advance, acting as a "Pre-MPIN Risk Shield" to prevent failed or pending transactions in payment and booking systems (UPI, ticketing).
- Built an interactive sandbox studio simulating real-world scenarios: Google Pay / PhonePe / Amazon Pay mock flows, cinema seat-booking contention, and e-commerce flash sales.

### RemindGo — Privacy-First Windows Task & Reminder Manager

Electron, React, TypeScript, SQLite, Tailwind CSS

- Built a fully offline desktop task and reminder manager with scheduled tasks, always-on-top alarm popups, native Windows notifications, and snooze/missed-alarm recovery after sleep or screen unlock.
- Implemented a GitHub-style 52-week productivity heatmap with daily streak tracking, task priority/category/tags, recurring tasks, and a local SQLite database with JSON backup and restore — no accounts, servers, or telemetry.

## INTERSHIPS

**Cloud Computing Intern (AWS) — Skill Nexus** 22 Sep 2026 – Present

- Online internship in the domain of Cloud Computing (AWS).
- Offer Letter: [View Offer Letter](#)

**MERN Stack Development Intern — Emertxe Information Technologies, Bangalore** 12 Aug – 16 Sep 2026

- Online internship (Cohort WMSI26\_008) building "HomelyHub – Property Booking Platform" using the MERN stack. (Completed)
- Internship Certificate: [View Internship Certificate](#)

## CERTIFICATIONS

- Programming in Java — NPTEL (Scored 83%) | Java Programming for Beginners — IBM (Nov 2025)
- Deloitte Australia – Data Analytics Job Simulation — Deloitte (Jul 2025)
- AWS – Solutions Architecture Job Simulation — AWS (Jan 2026) | 100 Days of Code — Udemy
